The American Academy of Actuaries (AAA) Stop Loss Risk-Based Capital Work Group is Reviewing the Potential Need for Changes in the RBC Factors

By Michael L. Frank

The stop loss product lines are unique given that a significant portion of the business in the industry involves two or more parties (including reinsurers, issuing carriers and managing general underwriters). As a result, it will take significant energy to ensure that duplicate experience is not reflected in the review. Prior members of the work group have taken considerable care not to have duplicate experience, and the current work group will also focus its energy here.

Insurance companies and reinsurers interested in supplying data for the study should contact Barbara Scott at the SOA, at bscott@soa.org, to provide her with your name and contact information. Updates for the work group will be provided in future newsletters.
